PROFESSIONAL SUMMARY

Enthusiastic and motivated React developer seeking to apply modern web development skills in a collaborative environment. Experienced in creating performant, reusable components and building mobile-responsive UIs.

EDUCATION

June 2020–June 2024

St.joseph college of engineering ,chennai

Related Coursework: Bachelor of technology in Information Technology

GPA: 8.34/10.00

RELEVANT EXPERIENCE

Spiro prime tech services,Chennai

July 2024 - Present

Junior Software developer

Smart Chatbot with Custom NLP Model

- React | django | scikit-learn | NLP
- Designed a chatbot web app powered by a locally trained NLP model for natural language intent recognition and FAQ answering.
- Built the backend using django and trained a lightweight NLP model using scikit-learn and NLTK for offline inference.
- Connected the React frontend to the Python backend using REST APIs for real-time message interaction.
- Implemented a conversational UI with auto-scrolling chat, typing indicator, and intent-based response generation.
- Ensured full functionality without third-party AI APIs, demonstrating complete local model integration.

SKILLS

- React.js,JavaScript ,Python(AI & ML)
- HTML/CSS, Bootstrap
- REST API, Git
- Basic understanding of Node.js and Mysql

INTERN EXPERIENCE

Janury 2024 - April 2024

Inamkes Infotech

- Designed and implemented a real-time ambulance detection system using two separate models: one based on visual input (image/video) and the other based on audio signals
 - Image Model: Utilized OpenCV and object detection techniques to identify ambulances in traffic from camera feeds.
 - Audio Model: Processed environmental audio using Fourier transforms and feature extraction to detect ambulance sirens with high accuracy.
-
